Frontend Developer who enjoys transforming ideas into fast, responsive, and engaging web experiences using React, Next.js, TypeScript, and Tailwind CSS. Passionate about solving problems, learning deeply, and building products that create real value for users. Dedicated to continuous growth and delivering high-quality, maintainable solutions.

Experience

Frontend Developer Intern, RWA Inc | Development & Internship

**04/2026 – Present
(Remote)**

- Built and delivered multiple dashboard pages for Enter App, an AI-native IDE platform, including a Projects management page with grid/list view toggle, a Connectors page with dynamic integration management, and a Connector detail page with real-time connect/disconnect functionality
- Implemented dynamic routing with Next.js App Router including static and dynamic routes (/connectors/[id]) for scalable page architecture
- Collaborated with a cross-functional remote team using Git branching, pull requests, and conflict resolution workflows on GitHub
- Built reusable UI components with TypeScript, React, and custom CSS design tokens following a shared design system
- Translated Figma designs into pixel-perfect, responsive interfaces maintaining consistency across the product
- Actively working with modern frontend tools including React, TypeScript, and Tailwind CSS to build responsive and maintainable interfaces
- Participating in training sessions and development discussions while preparing to contribute to production-level UI features

Frontend Developer Intern, STX Technology

05/2025 – 11/2025

- Developed and maintained user-facing websites using HTML, CSS, JavaScript, and ReactJS.
- Developed reusable components for future use in other projects.
- Developed responsive website layouts using HTML, CSS, and JavaScript
- Collaborated with back-end developers on integrating APIs into front-end solutions.
- Provided technical support for users experiencing issues with webpages or applications.

Skills

- Responsive web designing
- Focus on performance optimization, accessibility, and clean UI design
- Agile development practices and continuous learning through projects Designing, integrating, and optimizing.
- Restful APIs Basic understanding of testing, debugging, and improving quality

Technologies

- Languages: JavaScript (ES6+) TypeScript,
- Frontend: React, Next.js,
- Development: VS Code, Cursor, Tailwind CSS
- Collaboration: Jira, Plane, Figma

Education

Bachelor of Science (Education), University of Ilorin

12/2018 – 10/2023
Kwara, Nigeria
